Program Guide For 2020

The Fintech Institute (TFI) Program Guide for 2020

The Fintech Institute (TFI) is focused on bridging the knowledge gap between today's fast-paced technology requirements and the skill set of technology and business practitioners. It does this through specialized learning programs aimed at equipping industry stakeholders and organizations with the requisite tools needed to compete and succeed in the lucrative, but constantly evolving world of Fintech.

Our programs offer individuals and organizations endless possibilities, which can only be unlocked through visionary leadership that fosters early adoption and mastery of these emergent technologies and digital innovations, to further improve customer and business propositions.

Our learning and development programs are designed to update, augment and refresh the skills of practitioners; as well as those who seek to favorably reposition their organizations to dominate markets and compete effectively in the borderless digital world. Our programs address a full participant spectrum at all levels of disruption including Board level, Managerial level, Middle level and Entry level employees in both public and private sectors.

Please note that our 2020 programs below are also available in many formats such as open programs, masterclasses, bespoke learning programs and destination learning packages which can be tailored to suit your organization's unique needs.
